MARKET REVIEW

On December 7, 1966 the Secretary of Agriculture determined that sugar requirements for consumers during calendar year 1967 would be 10,200,000 short tons, raw value. At the same time limitations on foreign raw sugar importations were established at 900,000 tons for the first quarter and 1,900,000 tons for the first half of 1967. This was an increase of 150,000 over the quantities originally proposed for the first quarter and first half.

Cane sugar refiners' deliveries of sugar for U.S. consumption during 1966 are expected to reach 7,000,000 tons for the first time. During the three previous years refiners deliveries averaged 6,729,000 tons. Beet sugar processors will market their quota of 3,025,000 tons and other primary distributors are expected to market about 240,000 tons in 1966.

The spot price for domestic raw sugar at New York that had been at 7.12 cents per pound from October 28 through November 28 went to 7.15 cents on November 29 to 7.17 cents on November 30 and was 7.20 cents from December 1 through December 7. After the announcement of an increase of 150,000 tons in first quarter 1967 imports of foreign raw sugar, the spot price went down to 7.15 cents on December 8 and 9 and has been at 7.12 cents per pound through December 16. The average price for the period January 1 - December 16, 1966 has been 6.99 cents per pound or 0.24 cent above the 1966 calendar year average.

The wholesale price for refined cane sugar at New York was increased 0.15 cents on December 12 making the price 10.60 cents per pound. The calendar year 1966 price may average about 10.36 cents per pound or 0.14 cent above the 1965 average.

Refined price increases had been announced to be effective December 19 in the Chicago-West, Southeast and Gulf territories. The increase was rescinded in the Chicago-West territory but no such notice had been received as of December 16 concerning the other two territories and as of that date the wholesale refined sugar prices in 100 pound paper bags were as follows:

	<u>Cane</u>	<u>Beet</u>
	<u>Cents per pound in 100 lb. paper bags</u>	
Northeast	10.60	
Southeast	10.05	
Gulf	10.05	
Eastern beet		9.80
Chicago-West	10.00	9.80
Direct-shipment territory	9.90	9.70
Lower Pacific Coast	9.95	9.95
Northwest-Intermountain	9.85	9.85

The 1966 annual summary of crop production issued in December by the Crop Reporting Board of the Department estimated 1966 crop sugarbeet production at 20,259,000 tons, down 791,000 tons from the November estimate. Beet sugar production was estimated at 2,850,000 tons, raw value. The 1966 crop under the Sugar Act will include Arizona production during 1967 and will include sugar beets harvested in the Imperial Valley during 1967 rather than those harvested in 1966.

The beet sugar effective inventory at the beginning of 1967 (sugar on hand and to be processed from 1966 crop sugarbeets) is expected to total about 2,400,000 tons or about 140,000 tons less than at the beginning of 1966. Deliveries during the first nine months of 1965 were 2,294,000 tons and in 1966 they were 2,382,000 tons. Apparently beet sugar sellers will have sufficient supplies to market in this range before the major part of their producing season in the fourth quarter becomes available.

In the mainland cane area the estimate of Louisiana cane production was lowered 473,000 tons from previous months to 7,875,000 tons. This resulted from the freeze of November 3 which not only reduced cane production but resulted in much lower sugar recovery and may have reduced sugar production by 75,000 tons.

The Florida sugarcane production estimate was increased 32,000 tons to 6,336,000 tons with every indication that sugar recovery would be at a high level.

Sugar production for the two states was estimated 1,225,000 tons or 121,000 tons more than from the 1965 crop. Based on this estimate the mainland cane area's effective inventory would total 792,000 tons at the end of 1966 or 125,000 tons more than at the beginning.

Hawaiian cane production for 1966 was estimated at 11,805,000 tons or 7,000 tons more than the November estimate. Sugar production was estimated at 1,245,000 tons by the Crop Reporting Board. The previous record high was the 1,218,000 tons of sugar in 1965.

World raw sugar prices that were at 1.45 cents from December 1 through December 12 declined to 1.40 cents on December 16, the same as the previous low reached in November. The calendar year 1966 average will be about 1.86 cents per pound or 0.24 cent less than the 1965 average price and the lowest yearly average since 1941.

The Foreign Agricultural Service of the Department estimated world centrifugal sugar production for 1966-67 at 72,834,000 short tons, raw value. This would be a record level of production and would be a 6 percent increase over the previous year's crop. Most of the increase is expected to be in the Communist countries with only a slight increase in free world production. A further increase in total world stocks is indicated with production at the level of the estimate.

F. O. Licht issued their first estimate of world sugar production as 66,478,890 metric tons, raw value, equivalent to 73,280,000 short tons or 446,000 tons higher than the F.A.S. estimate. The greatest difference in country estimates is for Mainland China where Licht shows production of 2,667,000 short tons while F.A.S. estimates 1,800,000 short tons, a difference of 867,000 tons.

Authorized Raw Sugar Imports During First Quarter of 1967:

The United States Department of Agriculture on December 21 authorized the importation of 900,000 short tons, raw value, of sugar during the first quarter of 1967.

The allocation to countries was made pursuant to criteria established in Sugar Regulation 811 as published in the Federal Register Dec.10, 1966.

Applications were considered by giving first priority to average importations in the first quarters of 1963, 1964, 1965 and 1966; second priority to bringing importations from each country up to 20 percent of the annual quotas, and third priority to prorating the remainder in ratio to the first priority.

Importers or other applicants for quota clearances or quota set-asides are being notified of the disposition of their requests. A quantity of 18,181 tons has been reserved for first quarter importations from Guatemala. Several firms submitted applications but it is not clear which of these control this sugar as owner or agent. Final action will be deferred in order to give the parties reasonable opportunity to resolve the question.

The quantities requested and approved are shown in the table on page 6. For the convenience of importers interested in submitting applications on or before Jan. 13, 1967 for second quarter importations, the quantities shown in Column 6 of the table represent first priority for such importations.

Country	: 1st quarter : : applications : : received :	Applications approved				: Memorandum : : first : : priority for : : second 1/ : : quarter :

1/ First half average imports 1963-66, less quantities approved for first quarter importation.

SUGAR REQUIREMENTS FOR 1967 ANNOUNCED

Secretary of Agriculture Orville L. Freeman on December 7, 1966 determined the quantity of sugar to meet the requirements of consumers in the continental United States for 1967. Today's determination is the same as the Secretary proposed and announced on November 15 (Press Release USDA 3664-66) except that 900,000 tons of raw sugar may be imported from foreign countries during the first quarter, an increase of 150,000 tons over the quantity proposed.

The import limitation for the first quarter is being increased to assure adequate supplies of sugar for consumers at fair prices. As the harvest of 1966 crop Louisiana sugarcane progresses, it becomes evident that the early November freeze has reduced expected sugar production somewhat. This reduces the quantity of domestic raw sugar available for marketing in the first quarter of 1967 and may account in part for the strong demand for raw sugar imports noticeable in the market last week and for the 15 cent per hundredweight increase in the price of refined sugar which refiners have announced to become effective in the northeastern part of the country on December 12. The increased imports provided by the order will more than offset any reduction in the output of Louisiana raw sugar and make more sugar available for the early part of the year than was consumed in the corresponding portion of any other year.

Today's actions include:

1. Determination of sugar requirements and the establishment of quotas for the calendar year 1967 totaling 10.2 million short tons, raw value.
2. Quarterly limitations for the first half of 1967 on importations of raw sugar from all foreign countries, as a group, as follows:

First quarter	900,000 tons
Second quarter	1,000,000 tons

3. The quota for Southern Rhodesia is reserved for later disposition and the quota for Bolivia is subject to a reduction of as much as 958 tons.

4. Priorities for approving applications for importation during the first quarter and the second quarter of 1967 are as set forth in the proposed determination which was published November 19, 1966, in the Federal Register at page 14745. Applications for the importation of sugar or for set aside of quota for arrival during the first quarter of 1967 received on or before December 19 will be considered as having been received at the same time. Applications for the importation of sugar during the second quarter received on or before January 13, 1967, will be considered as having been received at the same time.

The 1967 quotas for domestic areas and foreign countries and average imports of raw sugar into the continental United States, within quotas, for the first quarter and first half of 1963, 1964, 1965 and 1966 are as shown in the table on page 9.

Reallocation of 1966 Sugar Quota Deficits announced

The U. S. Department of Agriculture on December 16 declared additional deficits in the 1966 sugar quotas totaling 26,000 short tons, raw value. Of this total, 19,000 and 4,595 short tons, raw value, represent additional deficits from Puerto Rico and the Virgin Islands, respectively, and 958 and 1,447 short tons, raw value represent deficits in the quotas for Bolivia and India respectively.

The deficits in quotas determined for Puerto Rico, the Virgin Islands and Bolivia are prorated to Western Hemisphere quota countries and the deficit in the Indian quota is prorated to non-Western Hemisphere quota countries other than the Republic of the Philippines and Ireland. Prorations are made to countries for which no deficits have been determined. Most of those countries have sufficient over-quota sugar arriving this year to fill their prorations without resorting to additional shipments.

The deficit determinations and prorations and revised quotas are shown in the table on page 10.

Production area	Basic quotas	Temporary quotas and prorations pursuant to Sec. 202 (d) 1/	Total quotas and prorations	Average imports into the United States during 1963, 1964, 2/ 1965 and 1966

1/ Includes the proration of quotas withheld from Cuba and Southern Rhodesia and the proration of the quota for Honduras to Central American Common Market countries.

* Direct-consumption limit: Hawaii - 35,482 tons; Puerto Rico - 155,625 tons; Republic of Philippines - 59,920 tons; Panama - 3,817 tons; and Ireland - 5,351 tons.

ADMINISTRATIVE ACTIONSDate announcedNature of action

November 30,
1966

Announced a proposed amendment to the regulations governing importations of sugar and butterfat and/or flour mixtures for the 1967 calendar year.

The proposed amendment would establish the quantity of these mixtures which can be imported from each country during 1967. The proposed amendment would also make several minor changes in the procedural requirements, dealing primarily with the order in which applications to import these mixtures may be authorized on a first-come-first-served basis and the requirement that the importer furnish certain information with respect to each shipment. (See December 2, 1966 Federal Register).

December 2,
1966

Announced estimated 1967 sugar requirements and quotas of 50,000 and 130,000 short tons, raw value, for local consumption in Hawaii and Puerto Rico, respectively.

The proposed quotas are the same as those established for serving the local sugar needs in the calendar year 1966.

During the 12-month period ended Sept. 30, 1966, the quantities of sugar distributed for consumption in Hawaii and Puerto Rico -- including that lost in refining after charge to local quota -- were approximately 42,000 and 121,000 short tons, raw value, respectively. (See December 7, 1966 Federal Register).

<u>Date announced</u>	<u>Nature of action</u>
December 6, 1966	<p>Announced revised 1966 marketing allotments to beet sugar processors.</p> <p>The revised allotments are the result of determining deficits in allotments of 19,052 short tons, raw value, of 3 processors and the proration of this quantity to the remaining processors since they all notified the Department that they were able to market additional sugar. (See December 8, 1966 Federal Register).</p>
December 15, 1966	<p>Announced a series of public hearings on wage rates for the 1967 crop of sugarbeets. The hearings will be held between Jan. 9 and Jan. 23, 1967, in cities within the major producing and labor supply regions of the sugarbeet area.</p> <p>The schedule of meetings follows:</p> <p>At Detroit, Mich., Jan. 9, 1967, Sky Room, Pick-Fort Shelby Hotel, beginning at 9:30 a.m.;</p> <p>At Fargo, N.D., Jan. 11, 1967, Strike Room of the Bowler, Inc., beginning at 9:30 a.m.;</p> <p>At Denver, Colo., Jan. 13, 1967, Room 2330, Federal Building, 1961 Stout St., beginning at 9:30 a.m.;</p> <p>At San Francisco, Calif., Jan. 16, 1967, Room 13216 B-13th Floor, Federal Building, 450 Golden Gate Ave., beginning at 9:30 a.m.;</p> <p>At San Antonio, Texas, Jan. 18, 1967, South Terrace Room, Gunter Hotel, beginning at 9:30 a.m.;</p> <p>At McAllen, Texas, Jan. 20, 1967, Tee Room, Fairway Motor Hotel, beginning at 9:30 a.m.;</p>

Date announcedNature of action

December 15,
1966 (cont'd)

At Syracuse, N.Y., Jan. 23, 1967, West Room,
Yates Hotel, corner Montgomery and East Genesee
Streets, beginning at 9:30 a.m.;

The series will be considered as one hearing, and
testimony at each place will constitute a part of the
same record. Persons may present testimony at
any of the designated places.

To obtain the best possible information, USDA re-
quests that all interested persons appear at the
hearings to express views and present appropriate
data. (See December 20, 1966 Federal Register).

STATISTICAL SERIES IN THIS ISSUE

HIGHLIGHTS

1. November 1966 sugar deliveries for continental U. S. consumption 774,000 short tons, raw value (preliminary), up about 11,000 tons from October 1966 but down 3,000 tons from November 1965. January-November 1966 deliveries 9,441,000 short tons, raw value (preliminary), up 283,000 tons from January-November 1965. Final data for October 1966 deliveries 763,000 short tons, raw value - previously published preliminary as 783,000 tons.

2. Primary distributors' stocks December 3, 1966 were 2,046,291 short tons, raw value (preliminary), down 120,000 tons from a year ago, and up 586,000 tons from end October 1966. During November refiners' stocks increased by 77,000 tons, beet processors' stocks by 466,000 tons, mainland cane processors' stocks by 55,000 tons, and importers of direct consumption sugar stocks decreased 11,000 tons.

3. Charges to 1966 quotas through November 30, 1966 were 9,663,094 short tons, raw value, leaving a balance of 711,912 tons to be supplied within the 10,375,000 ton total.

4. Regionally, January-October deliveries, 1966 as compared to 1965, were up in all of the 5 regions: Increases -- West 9.4 percent, New England and Mid-Atlantic 3.4 percent, North Central 2.7 percent and South 1.0 percent.

5. Third quarter 1966 sugar deliveries were larger to all of the seven industrial user groups than for the same 1965 quarter, and they were also larger to 3 of the four non-industrial buyer groups. To industrial buyers the national increase was 10.3 percent, and to non-industrial buyers 0.4 percent. Corn refiners' total domestic shipments of corn sirup and dextrose were up by about 7.6 percent.

Bulk blends ^{4/}	499	517	-	-	419	517

^{1/} Sirup mixers outside of the corn refining industry, except cane sugar refiners and beet sugar processors; the latter two are included with "Miscellaneous food industries."

^{2/} Due to rounding, totals may not be exact sums of individual items.

^{3/} According to the Census of Manufactures 1958, shipments of corn sirup solids were 63.7 percent of total shipments of miscellaneous refinery products. Since corn sirup solids contain up to 3.5 percent moisture, corn sirup solids dry basis are estimated as 61.5 percent of shipments of miscellaneous refinery products as reported. For earlier treatment of this item see Sugar Reports 93, page 6.

^{4/} Distributed among the various types of buyers listed above.

NOTE: See Sugar Reports No. 93, January 1960, pages 6-10 for source, methodology and groupings.

1/ Spot prices are for bulk sugar under Contract No. 7, the terms of which are duty paid or duty free, full duty rate .625 cent per pound.

2/ Spot prices are those under No. 8 Contract which is for bagged sugar f.o.b. and stowed at Greater Caribbean ports (including Brazil).

3/ The No. 7 "Domestic Bulk" Contract has been adjusted by deducting duty (.625¢), computed freight from the Greater Caribbean ports (including Brazil), insurance and unloading charges and adding the bag allowance (currently .055¢) before calculating the differential from No. 8 "World" Contract spot prices.

4/ These are basis prices in 100-pound paper bags, NOT delivered prices. To obtain delivered prices add "Freight Prepays" and deduct discounts and allowances. For illustration see Sugar Reports 81, January 1959, pages 5 to 9.

Table 21.-Wholesale prices of sugar, corn sirup and dextrose

Period	Refined sugar	Dextrose	Corn sirup	Dextrose	Corn sirup
	wholesale	New York 2/	New York 3/	relative to refined sugar	relative to refined sugar
	North-east 1/	Quoted	Dry basis 4/	Quoted	Dry basis 4/

1/ Gross basis price in 100 pound bags subject to a 2 percent cash discount.

2/ Hydrate, commercial bags less than carlots, ex whse., N.Y 100 lbs. Beginning April 1964 price is for 600 bag carload f.o.b. N.Y.

3/ In drums, price in carload lots, except from February 1962 to April 1964 for less than carload lots. Beginning April 1964, price is for tank cars f.o.b. New York, per cwt. Quoted as 42 percent unmixed, except beginning March 1956, quoted as 43 percent unmixed.

4/ Assumes price is for 92 percent solids for dextrose and 80.3 percent solids for corn sirup. Thus dry basis price is quoted price divided by 0.92 for dextrose and 0.803 for corn sirup.
